MY PORTFOLIO

[HTTPS://JIANGDT.NETLIFY.APP/](https://jiangdt.netlify.app/)

EXPERIENCE

FRONT END DEVELOPER

FUN J SOFTWARE DEVELOPMENT

Feb 2024 - current

- Designed and implemented user interfaces for the admin websites using ReactJs, Typescript, and Ant Design for the design component.
- I also handle the landing page, PC, and H5 platform using Vue.JS, that can be download to the android and ios phone's
- Collaborate with the backend team to achieve front-end and back-end data interaction and Support QA team in resolving issues.
- Support enhancements and maintenance of deployed applications.
- We use JENKINS - CI/CD to build for our TEST/PROD environment.
- GITLAB for collaboration

FRONT END DEVELOPER

PHILTECH INFO SERVICES INC (FILBET.COM)

Jun 2023 - Jan 2024

- Redvelop from scratch the company project from Nuxt.JS to NEXT.JS, Redux, and Tailwindcss. (App/Web)
- We used REACT-HOOK-FORM to handle the FORMS. And allows to manage form state and validation with minimal effort.
- Redux for state management, and Tailwind and Sass for our styles
- Optimize the web application and improve the SEO of the application.
- Collaborate with other teams to communicate about the project flow.
- We used JIRA to track our tasks.

FRONT END DEVELOPER

RI-RANCE REALTY CORP. (PROJECT BASED)

Mar 2023 - June 2023

- Support enhancements and maintenance of deployed applications.
- Bug fix and adding new features, to our existing projects.
- Collaboration with other teams like the backend, Product designer, and QA's

FRONT END DEVELOPER

VAVASOFTWARE CORP. (PROJECT BASED)

Dec 2022 - Feb 2023

- Maintain an existing website for Web applications Responsively using vue.js and bootstrap.
- Designed and implemented user interfaces for the admin websites using ReactJs
- Develop a landing page for our web application using WordPress. (Elementor)
- We used a bitbucket and JIRA to track our commits or tasks.

FRONT END DEVELOPER

DYNAMIC STRATEGY

Jun - Dec 2022

- Maintain an existing website for WEB/H5 application.
- Bug fixing and Develop a new sites, new design, new features for our websites.
- Collaboration with other teams like the backend, Product designer, and QA's
- Deploying our website in UAT/FAT environment.

FRONT END DEVELOPER

FREELANCE

2021 - 2022

- Responsible for creating the user interfaces for the projects that the client needed using Vue, Reactjs, and Typescript. And NodeJS for the backend.
- Collaborate with UI/UX designers to communicate regarding the design, And they use Figma to mockup, and I will translate it into front-end code.
- Collaborate with the backend team for the API integration. I used Postman to test the API from the backend.
