EXPERIENCE

FRONT END DEVELOPER

FUN J SOFTWARE DEVELOPMENT   Feb 2024 - current

- Designed and implemented user interfaces for the admin websites using ReactJs, Typescript and PC and H5 Landing page platform using VueJs
- Collaborate with the backend team to achieve front-end and back-end data interaction and QA's teams to test the features that I added, using the TEST/UAT environment, before we deploy in the PROD/FAT environment.
- We use JENKINS - CI/CD to build for our TEST/PROD environment.
- GITLAB for push ,pull, merge the tasks/changed that i committed and also for collaboration

FRONT END DEVELOPER

PHILTECH INFO SERVICES INC (FILBET.COM)   Jun 2023 – Jan 2024

- Redevelop the company project from Nuxt.JS to NEXT.JS, Redux, and Tailwindcss. (App/Web)
- Server-side rendering (SSR) and static site generation (SSG) for rendering the data. and we also used AXIOS to make HTTP requests from the browser and transform request and response data.
- We used REACT-HOOK-FORM to handle the FORMS. And allows to manage form state and validation with minimal effort.
- Redux for state management, and Tailwind and Sass for our styles
- Optimize the web application and improve the SEO of the application.
- Collaborate with other teams to communicate about the project flow.
- We used JIRA to track our tasks.

FRONT END DEVELOPER

RI-RANCE REALTY CORP.   Mar 2023 – June 2023

- Optimize and add a new Design/Theme for our existing projects.
- Bug fix and adding new features, to our existing projects.
- Collaboration with other teams like the backend, Product designer, and QA's

FRONT END DEVELOPER

VAVASOFTWARE CORP.   Dec 2022 – Feb 2023

- Maintain an existing website for Web applications Responsively using vue.js and bootstrap.
- Add a new feature for out admin site.
- Develop a landing page for our web application using WordPress. (Elementor)
- We used a bitbucket and JIRA to track our commits or tasks.

FRONT END DEVELOPER

DYNAMIC STRATEGY   Jun – Dec 2022

- Maintain an existing website for WEB/H5 application.
- Bug fixing and Develop a new sites, new design, new features for our websites.
- Collaboration with other teams like the backend, Product designer, and QA's
- Deploying our website in UAT/FAT environment.

FRONT END DEVELOPER

FREELANCE   2021 - 2022

- Responsible for creating the user interfaces for the company projects using Vue and Reactjs, Typescript. And NodeJS for the backend.
- I'm using Postman to test the APIs.
- Collaborate with UI/UX designers to communicate regarding the design, And they use Figma to mockup, and I will translate it into front-end code.
- Collaborate with the backend team for the API integration. I used Postman to test the API from the backend.
